

What is FRC?

The Florida Remediation Conference is the Southeast's premier soil and groundwater cleanup conference of the year. Over 450 professionals joined us for FRC 2016.

Over the years, FRC has developed a solid reputation for a casual atmosphere that's conducive to good communications between all participants—speakers, attendees and exhibitors. After all, a great conference experience does not have to be formal and stuffy, does it?

So ... what exactly is FRC?

- FRC is two days of technical presentations on cleanup techniques and technologies. Most presentations are 20-30 minutes in length, providing enough time for our subject matter experts to fully flesh out the ins and outs of their topic, leaving plenty of time for questions and answers that benefit all attendees. In addition, we have experimented with a five-minute "speed talk" format that will likely be back in 2017.

We are an approved continuing education provider for the Florida Board of Professional Engineers. All Florida PEs earn 11.5 PDHs towards their renewal requirements. In addition, our conference is accepted by many states that require continuing ed for professional geologists and other practitioners.

- A day and a half of product and service company exhibits that cater to the needs of the remediation professional in Florida and the Southeast including equipment vendors; in-situ bio technologies; industrial service firms providing emergency response, waste management, health and safety training and other services; drillers; labs and many more.
- An agenda that includes adequate time before, during and after the technical sessions for attendees to meet and visit with exhibitors and speakers, and make the most of their conference experience.
- A very cool charity golf tournament that kicks off the festivities on the day before the conference. We have raised over \$125,000 in the seven years that we have conducted the charity event.

Why not join us for FRC 2017? You will benefit from the time spent, and will take knowledge and contacts back to the shop that will be useful on your next project.

Complete information will be available at www.enviro-net.com under the FRC logo. Or contact FRC Conference Manager Mike Eastman at mreast@enviro-net.com or (407) 671-7777 for more information for getting involved.
