

What is FRC?

The Florida Remediation Conference is the Southeast's premier soil and groundwater cleanup industry conference. Over 500 professionals joined us in Orlando last year for FRC.

Over the years, the conference has developed a reputation for a casual atmosphere that's conducive to good communications between all participants—speakers, attendees and exhibitors. After all, a great conference experience does not have to be formal and stuffy, does it?

Specifically, FRC is:

- Two days of technical presentations on cleanup techniques and technologies. Presentations are of various lengths and provide time for our subject matter experts to fully flesh out the ins and outs of their topic and leave time for questions and answers that benefit all attendees. In addition, we have implemented a short “Speed Talk” format that will be back in 2018, along with a continuing focus on involving “Young Professionals” in the event.
- An approved Continuing Education Provider for the Florida Board of Professional Engineers. All Florida PEs earn 12 continuing education (CE) credits toward their license renewal requirements. In addition, our conference is accepted by many states that require continuing ed for professional geologists, CHMMs and other industry practitioners.
- A day and a half of product and service company exhibitors that cater to the needs of remediation professionals in Florida and around the Southeast U.S. including equipment vendors; in-situ bio technologies; industrial service firms providing emergency response, waste management, health and safety training and other services; drillers; environmental labs and much more.
- A conference with an agenda that includes adequate time before and after the technical sessions for attendees to meet and visit with exhibitors and speakers to make the most of their conference experience.
- A very cool charity golf tournament that kicks off the festivities on the day before the conference. We have raised over \$170,000 in the eight-year history of the event.

Plan now to join us this year for FRC on Dec. 5-6, 2018. You will benefit from the time spent and will take both knowledge and industry contacts back to your office that will be useful on your next project.

Complete information on the conference will be available right here at www.enviro-net.com under the FRC logo. Or contact FRC Manager Mike Eastman at mreast@enviro-net.com or (407) 671-7777 for more information.
